

Inlet - bottom of tank to invert of pipe - 44"
 Outlet - bottom of tank to invert of pipe - 42"

All dimensions inches.

Designed for 30" cover in non-traffic area. Tanks have large inlet baffles and gas baffle on outlet baffle. Effluent filters are opt. Inspection spec tag placed near inlet manhole. Manholes marked 'danger'. Joints have mastic sealant. Ends marked IN/OUT and Std./E.F. Three black pipe seal inlets and one red pipe seal outlet. Concrete plug type manholes with two s.s. handles for access.

Recommended excavation size is 1' longer and 1' wider than tank dimensions. Depth should be over dug to allow 2-4" of sand for levelling/bedding purposes.
